SACM Upgrade Service, Service TCP-SACM-UG1

Pricing: approximately \$1,200 for a batch of 10 SACM - Revision 'A' boards
(Call for quote update as prices are subject to change without notice.)

The upgrade service involves the modification of a generic TCP SACM Revision 'A' board to a SACM/PTC configuration suitable for standalone operation without USB connection to a host computer. The service includes the following:

- Replacement of an original 128-byte 24LC01B EEPROM with a larger capacity 32-KiloByte 24LC256 EEPROM.
- The addition of a two-pin jumper header to ease the process of reprogramming the EEPROM.
- Handling, inspection, and validation of the hardware changes.

A customer requesting the upgrade service pays for shipping and insurance.
